

ANDREA PARDO | SENIOR PRODUCT / UX DESIGNER

CONTACT DETAILS

LinkedIn: nz.linkedin.com/in/andrearpardo

Wellington, New Zealand

PERSONAL STATEMENT

I design and improve digital products, from focused fixes to bigger systems. I work across product strategy, UX and UI, turning complex requirements into clear, accessible and scalable experiences. My work includes responsive web and mobile, design systems, user research and testing, and working closely with product and engineering through delivery. My front-end background helps me understand technical constraints and design solutions that are realistic to build.

SAMPLES OF MY WORK:

Personal Portfolio: <https://andrearp.github.io/index.html>

WORK HISTORY

Booster - <https://booster.co.nz/> - Senior UX/UI Designer | May 2021 - Today

- Own Booster's UX direction and be the subject matter expert for all things UX/UI. Deliver continuous incremental improvement through functions, features and upgrades.
- Collaborate with business team on both new product visions and existing feature refinements
- Discover what the business and the users need through: stakeholder workshops, user workshops, user interviews and research, competitors analysis, analytics analysis, success measurement, personas, user journeys, prototypes, usability testing, information architecture creation and testing.
- Communicate and illustrate design ideas using wireframing, process/user flows, UI mockups, interactive prototypes, sitemaps and other UX design tools. Deliver prototypes and responsible accessible designs that form the experience the users love.
- Create brand guidelines & digital assets for releases across mobile app and web
- Be the voice of UX throughout the organisation regularly presenting design progress, learnings and benchmarks where appropriate.
- Drive new approaches when needed based on evidence gained through customer insights.

Squiz - <https://www.squiz.net/> - Digital Designer | June 2018 - October 2020

- Main tasks: stakeholder workshops, user workshops, user interviews and research, competitors analysis, analytics analysis, success measurement, wireframes, personas, user journeys, prototypes, usability testing, information architecture creation and testing, product design (Intranet), design of responsive and accessible websites, design systems.

Ministry of Social Development - User designer | March 2018 - June 2018

- I was responsible for designing and developing user interfaces for Ministry websites and web applications. This position was also responsible for providing the technical expertise and support to the web team in user research, user testing, usability, accessibility, UI design techniques, methodologies and tools.
- My main achievement was the user research, wireframing, design refresh and extensive usability testing of the latest Work and Income website, to provide a user centered design and improved navigability to help citizens find the information they need and see MSD as a more transparent and caring organisation. I also worked with the team behind this site to make sure they would always keep the customers in mind and provide the service they need as times goes and the site evolves.

Squiz - <https://www.squiz.net/> - Digital Designer | November 2016 - March 2018

- Inspiring clients and prospective clients through the quality of our design solutions.
- Working collaboratively as part of the Experience Design team to understand our clients' business and users, and designing imaginative, effective, user-friendly User Interfaces expressed in project artefacts such as wireframes, skamps, mock-ups, prototypes, and finished designs. (Software and Apps I use: Sketch, Photoshop, InVision, Zeplin...)
- Developing concepts and executing User Interface design across a variety of digital projects principally responsively designed websites, intranets and web applications.
- Developing and interpreting creative concepts (rationales, sketches and wireframes) and proactively identifying any

optimisation issues whilst recommending practical working solutions.

- Using storytelling techniques as part of Experience Design process where helpful.
- Working with stakeholders and users, facilitating workshops for user research and user experience and also testing wireframes, IA and final designs. (Tools I used: Optimal Workshop software)
- Working closely with developers to ensure that final creative concepts and overall quality of work extends through to final build and implementation of all projects.

Quantate - <http://www.quantate.com> | August 2013 - November 2016
